Since the inauguration of Project RENEW in 2006, the program has served 651 children and their families. The following graphs and data, unless otherwise noted, present information about the 291 participants (N=291) served during Fiscal Year 2010 – June 2011. This represents a 10% increase in participants served over fiscal year 2009/10.

**Gender**—Of the 291 participants served during fiscal year 2010-2011, 186 were male, and 105 were female.
Age—A large majority of Project RENEW’s participants were over age eight, with nearly half of the participants in their teens. Only 4% were over 18 years of age, possibly due to the overlap that occurs when linking participants to another program or a lower level of care.

Ethnicity—Although the majority of RENEW’s diverse participants are Hispanic, RENEW serves children and families of other ethnicities and cultural backgrounds.
**Homelessness**—In the year prior to RENEW enrollment, seven participants had been homeless, in temporary emergency housing, or living in a shelter. Since enrollment, three participants experienced at least one day in the homeless or temporary housing category at any given time during fiscal year 2010-2011. This results in a 57% decrease in homelessness.

**Psychiatric Hospitalizations**—One of the goals of RENEW is to reduce the number of hospitalizations participants experience. In the year prior to enrollment in RENEW, 23 participants reported being admitted to a psychiatric hospital. Since RENEW enrollment, seven participants were hospitalized. Throughout fiscal year 2010-2011, RENEW participants have had a 69% decrease in psychiatric hospitalizations.

Incarcerations—In the year prior to RENEW enrollment, five participants reported being incarcerated. Since RENEW enrollment, 11 participants were incarcerated. Factors in this increase could be an increase in the legal education given to the families of participants, and the closer scrutiny given to participants while enrolled in the program.

Housing Sustainability—To show housing sustainability of RENEW participants, a “snapshot” of the month of June 2011 is used. During that month, 58% of 154 participants served throughout the month sustained their housing independently. The remaining received some level of housing subsidy, working to increase their contribution toward their rent each month with the goal of paying their rent in full.
**Education**—At the time of RENEW enrollment, 245 participants were enrolled in a school setting. Since RENEW enrollment, 291 participants have been enrolled. RENEW has had a 18% increase in school involvement.
