

Construction Alert

Aliso and Wood Canyons Wilderness Park Post-Fire Burn Area Protection

Project Summary

OC Public Works, in collaboration with OC Parks, will implement erosion and sediment control measures at various locations throughout the Aliso and Wood Canyons Wilderness Park in the City of Aliso Viejo in an effort to mitigate the impacts to slopes within the post-fire burn area. All construction activity will occur off of the recreational trails, however, roads and recreational trails within the park will be used for equipment hauling. Park users will be notified of haul routes by signs posted adjacent to trails. Traffic control signs will also be installed on various roads. Construction equipment and materials will be staged at designated areas within close proximity to the work locations for the duration of the project.

WHAT

OC Public Works will install various types of erosion and sediment control measures, including fiber roll, hydraulic mulch, burlap gravel bags, and silt fence as a preventative effort to protect fire-burned slopes from erosion.

WHEN

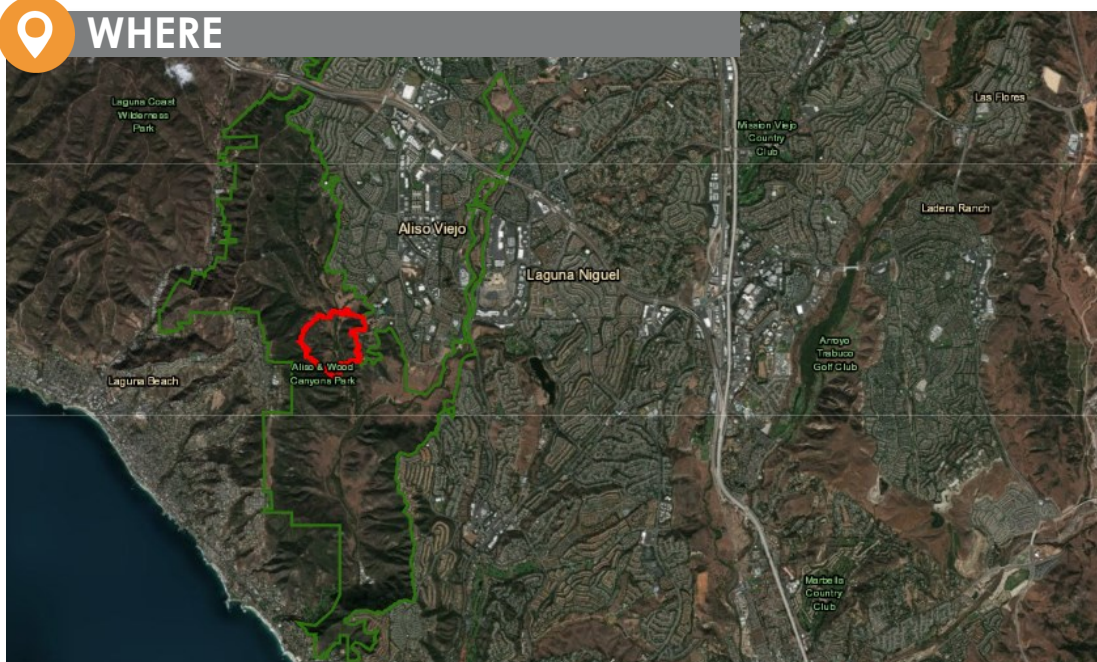

Anticipated Construction Duration

Early November — Late December 2018

Working Hours | Monday—Friday | 7 am — 4 pm

The construction schedule is tentative and subject to change due to weather and other factors.

WHERE

Work will occur within the park at fired burned areas adjacent to the following locations:

- Coyote Run Trail
- Dripping Cave Trail
- Mathis Trail
- Various fire access dozer roads

LEGEND

- Park Boundary
- Burn Area
